

MOHAMAD ELYOUSSEF

IT Networking & Security | Cybersecurity | Cloud Infrastructure

Ajman, United Arab Emirates | +971 56 976 1028 | mohamadelyoussef08@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year IT Networking & Security student at Ajman University with hands-on experience in penetration testing, secure network design, and cloud infrastructure. Skilled in industry-standard tools such as Kali Linux, Metasploit, Burp Suite, Wireshark, Nmap, and Cisco Packet Tracer. Holder of ISC2 Certified in Cybersecurity (CC) and the Google Cybersecurity Professional Certificate. Seeking a cybersecurity or network engineering internship where strong fundamentals, lab-tested technical skills, and a fast-learning mindset can contribute to securing modern enterprise environments.

EDUCATION

Ajman University — Ajman, UAE

Sep 2022 – Jan 2027 (Expected)

Bachelor of Science in Information Technology — Networking and Security

Relevant Coursework: Network Fundamentals, Cybersecurity, Cloud Computing, Database Systems, Operating Systems, Web Technologies, Mobile Application Development.

Al Ma'arifa International Private School — UAE

2014 – 2022

High School Diploma

TECHNICAL SKILLS

Cybersecurity & Pen-Testing: Kali Linux, Metasploit Framework, Burp Suite, Nmap, Wireshark, Nessus, Suricata, Vulnerability Assessment, Ethical Hacking, CTF Challenges

Networking: Cisco Packet Tracer, LAN/WAN Design, VLAN Segmentation, Subnetting (VLSM), Routing & Switching, VPN (Hub-and-Spoke), HSRP/VRRP, QoS, Firewall Configuration

Cloud & Virtualization: AWS EC2, IAM, Security Groups, AWS Cloud Foundations, AWS Cloud Operations, IoT & Cloud Computing, VirtualBox, VMware

Programming & Scripting: Python, Java, Kotlin, JavaScript, C#, SQL, Bash, HTML/CSS, R

Tools & Platforms: GitHub, Android Studio, Jetpack Compose, Unity, Linux, Windows Server

Soft Skills: Problem Solving, Teamwork, Time Management, Critical Thinking, Fast Learner

PROJECTS & PRACTICAL EXPERIENCE

Network Design & Management — TechNova Solutions

Ajman University

Lead Network Designer | Cisco Packet Tracer, VLAN, VPN, HSRP/VRRP, QoS

- Architected a scalable, secure WAN/LAN infrastructure supporting up to 150 concurrent users across three UAE branches for an expanding IT services company.
- Engineered a three-tier hierarchical topology (Core, Distribution, Access) on Cisco hardware with Hub-and-Spoke VPN connectivity for secure inter-branch traffic.
- Delivered 99.95% target uptime by integrating dual-homed ISPs, redundant multilayer switches/routers, and First-Hop Redundancy Protocols (HSRP/VRRP).
- Optimized performance for mission-critical apps with a 10 Gbps backbone and QoS policies prioritizing VoIP and video traffic at sub-50ms latency.
- Hardened the environment with perimeter firewalls, VLAN segmentation, MFA, and a Class C IP scheme using VLSM for efficient address allocation.

Cybersecurity & Penetration Testing Labs

Ajman University

Penetration Tester (Lab) | Kali Linux, Metasploit, Nmap, Burp Suite, Wireshark

- Performed vulnerability assessments on simulated enterprise environments using Nmap to enumerate open ports, services, and OS fingerprints.
- Executed controlled exploits against vulnerable hosts with the Metasploit Framework, documenting attack paths and remediation steps.
- Intercepted and analyzed web application traffic in Burp Suite to identify OWASP-class vulnerabilities (XSS, SQLi, broken auth) and recommend mitigations.
- Captured and decoded packet flows in Wireshark to investigate suspicious activity and validate network defenses.

AWS EC2 Cloud Lab

Ajman University

Cloud Practitioner | AWS EC2, IAM, Security Groups

- Provisioned virtual servers on AWS EC2 with hardened security groups, key-pair access, and least-privilege IAM roles.
- Deployed and configured basic web services on Linux instances and validated network reachability and access controls.

Car Maintenance Reminder — Android Application

Ajman University

Mobile Developer | Kotlin, Jetpack Compose, Android Studio, SQL

- Designed and built a Kotlin/Android app that helps users track and schedule vehicle maintenance with service reminders, mileage logs, and push notifications.
- Implemented a clean Jetpack Compose UI with reliable local persistence and tested for smooth performance and notification reliability across devices.

Gaming Website with Integrated Mini-Game

Ajman University

Front-End Developer | HTML, CSS, JavaScript

- Developed a responsive gaming website with an embedded JavaScript mini-game, including game logic, scoring system, and interactive UI elements.

Unity Game Development Project

Ajman University

Game Developer | Unity, C#

- Built an interactive Unity game in C# featuring core gameplay mechanics, player controls, basic AI behavior, collision detection, and a scoring system.

Web Development Projects

Ajman University

Full-Stack Web Developer | HTML, CSS, JavaScript, XML

- Built dynamic, responsive web applications including an e-commerce prototype with login, user tracking, shopping cart, cookies, and session management.

CERTIFICATIONS & COURSES

- Certified in Cybersecurity (CC) — ISC2 (Mar 2026)
- Google Cybersecurity Professional Certificate — Google / Coursera (Dec 2025)
- Advanced Relational Database and SQL — Coursera (Mar 2026)
- IoT, Wireless & Cloud Computing Emerging Technologies — Yonsei University (Mar 2026)
- Getting Started with Python for Data Science — ZAKA (Dec 2025)
- AWS Academy Graduate — Cloud Operations — Amazon Web Services (May 2025)
- AWS Academy Graduate — Cloud Foundations — Amazon Web Services (Mar 2025)
- Introduction to Networking and Storage — IBM (Mar 2024)
- Understanding Basic SQL Syntax — Coursera (Nov 2024)

ACTIVITIES & ACHIEVEMENTS

- Active member, Ajman University IT Club — participated in coding battles, hackathons, and CTF competitions hosted with Dubai Police Academy.
- Capture The Flag (CTF) Participant — solved exploitation, cryptography, and forensics challenges using Kali Linux and Burp Suite.
- Attended GITEX Global 2025 and Digital Dubai industry visits — engaged with cybersecurity and AI leaders from Cisco, AWS, Microsoft, Huawei, NVIDIA, and e&.
- Completed all 13 learning pathways in the Android Development with Kotlin program by Google for Developers.

LANGUAGES

- Arabic — Native
- English — Fluent (Professional Working Proficiency)
